### CLASSIC

The trimmings are cut manually or machine-made. The content of litharge in the glass is very low. All pieces are carefully checked for quality, which is confirmed with the certificate. Trimmings CLASSIC are the best choice for customers who seek for beautiful lighting units of quality - and for reasonable prices.

Эти подвески изготовлены ручной или машинной шлифовкой и полировкой. Содержание оксида свинца не нормируется. Качество всех подвесок строго контролируется и подтверждено в сертификате светильника. Подвески CLASSIC - замечательный вариант для покупателя, который хочет качественный и красивый светильник за разумную цену.

### CRYSTAL EXCLUSIVE

The machine-cut trimmings are characteristic with brilliant polish and decompose the light beams in a light spectrum. The lighting units with trimmings CRYSTAL EXCLUSIVE will attract even the most exacting customers.

## ARTGLASS AND PROJECTS

In the previous twenty years, the company ARTGLASS has gained rich experience not only in the field of production of serial small lighting fittings but also in the area of special and non-standard large chandeliers. A variety of state-of-the-art technologies is applied in combination with traditional manufacturing procedures which were used by Czech chandelier makers several centuries ago. To be successful even in today's demanding markets, offers are processed using a special 3D Solid Works visualisation program. Examples can be found on our website. At present, thanks to our special programs, we are able to „integrate“ the chandeliers directly into the interior pictures so that the final customers can see 3D projections of their installations as if they were real. In fact, the chandeliers manufactured in our plant are design- tailored to your interior and will lighten it up by their originality and remarkableness.

### ARTGLASS и проекты

Компания «ARTGLASS s.r.o. за время своего двадцатилетнего существования приобрела огромный опыт в производстве не только стандартных серийных светильников, но и в изготовлении специальных эксклюзивных люстр больших размеров. При создании таких светильников наряду с традиционными многовековыми методами чешских производителей люстр активно используются современные технологии и материалы. Для того, чтобы успешно конкурировать на рынке эксклюзивных и крупногабаритных люстр, все проекты атипичных светильников обязательно проходят этап визуализации в специальной программе Solid Works при помощи 3-D технологии. В нашем каталоге вы найдете примеры таких виртуальных интерьеров. Благодаря программе Solid Works мы можем «создать» и «сфотографировать» люстру, которая пока лишь является дизайнерской идеей, и затем вложить ее в имеющийся интерьер - чтобы вы увидели свой будущий светильник задолго до момента его «рождения». Люстры, произведенные нашей фабрикой «по индивидуальному проекту», придадут Вашему интерьеру еще большую оригинальность и неповторимость.
